President Taking a firm stand along the line we have all been thinking," he said. "His message struck a popular chord. We want competition, and in the end the best competition is water competition. The Missouri River should be a great highway for freight, lowering rates on land as well as on the water. If the Federal Gov- ernment would make the proper appropria- tion we could have this highway. I had the honor of introducing a bill appropri- ating \$200,000 for five years, to be used for this purpose. It is a large sum, but small as compared with the millions expended."
